

Original	Edited
<p>The Quiltmouse specialises in producing pre-printed foundation blocks for patchwork. I use a 50gsm paper that is suitable for both bubble jet & laser printers. I produce a wide variety of traditional blocks in a range of sizes as well as my own original designs.</p> <p>You can purchase these in block packs to design your own quilt or project or you can select a pattern pack. If you require a large number of blocks for your project consider my customised orders option, designed to keep your costs low.</p> <p>All my products come with cutting list & full instructions for the "Flip 'n Fold" method of foundation piecing that uses pre-cut fabric pieces. This method is by far the easiest technique I have ever used. So you can roller cut all your fabric pieces, grab your pre-printed blocks & sit down & start. It is so fast, easy & accurate. No tiresome tracing or guessing with fabric sizes. You'll feel like an expert when you achieve this wonderful level of accuracy with complex blocks.</p> <p>I am also available for workshops within Western Australia & try to negotiate "tours" within country areas, booking in several nearby townships within a few days to keep petrol costs down.</p> <p>I do hope you enjoy your stroll through my website & encourage you to contact me with any comments & requests or photos of projects you have made with my product.</p>	<p>The Quiltmouse (Bobbie Deans) specialises in creating and producing pre-printed foundation blocks for patchwork, and in running workshops in the use of Quiltmouse blocks.</p> <p>You can choose from a wide variety of traditional blocks (in a range of sizes) or from our original designs. You can purchase Quiltmouse blocks in 'block packs' to design your own quilt or project, or you can select a complete Quiltmouse 'pattern pack'.</p> <p>All Quiltmouse products come with a cutting list and full instructions printed on 50gsm paper. If you require many blocks for your project, check out our customised orders option which is designed to help reduce your costs.</p> <p>We use the "Flip 'n Fold" method of foundation piecing as we have found that this is by far the fastest, easiest, and most accurate. With this technique, you roller cut all your fabric pieces, grab your pre-printed blocks, then sit down and start - no more tiresome tracing or guessing fabric sizes. At the end of your project, you'll feel like an expert as you will have achieved a wonderful level of accuracy with complex blocks.</p> <p>Don't know where to start? Then contact us! Bobbie can run workshops anywhere within Western Australia. We try to keep travel costs down by planning several workshops in a region within the same time period, so if you know others in nearby towns who would like a workshop, let them (and us!) know when you are planning yours.</p> <p>Enjoy your stroll through our website, and feel free to contact us with any comments, requests, or photos of projects you have made with our Quiltmouse products.</p>
